

Fuerteventura-Lanzarote power system: two-node topology

FV-LZ system · 2025 close
Demand 1,592 GWh
Peak 272.3 MW
Conventional (cat. A) 364 MW
Wind 105.6 MW
Solar PV 61.2 MW
Renewable share 17.1%
Renewable curtailment 15.67%

- Thermal station (diesel + gas turbine)
- Wind farm
- Solar PV plant
- 132 kV link (single circuit)
- 132 kV island backbone (double circuit)
